

Visit by Department of Pharmacology, Government Medical College, Surat

A total of 32 individuals, comprising both faculty members and postgraduate students from the Department of Pharmacology, Government Medical College Surat, visited Maliba Pharmacy College on 08th Feb 2024. The highlight of the visit was the Preclinical methods of experiments, during which Dr. Bhavin and Dr. Rutvi showcased a wide range of fundamental methods used in experimental pharmacology. Participants were given useful knowledge on the complexities of preclinical testing, ranging from blood collection to oral dosage. In addition, the presenters presented a range of instruments, utilized in tests conducted on live animals, providing hands-on demonstrations that improved participants' comprehension of research methods. Furthermore, apart from the training, the attendees were provided with a guided tour of the campus amenities. Dr. Bhavin and Dr. Rutvi guided the party around laboratories, research centers, and academic buildings, offering a look into the institution's state-of-the-art infrastructure. The tour to the animal house and zebrafish facility was particularly intriguing, as participants had direct insight into animal care techniques and alternative research models. During the visit, the knowledge and direction of faculties created a collaborative and enjoyable learning atmosphere. Casual conversations facilitated the sharing of ideas and experiences, hence boosting the educational experience of the participants. The tour finished positively, with participants expressing appreciation for the priceless information acquired and eagerly anticipating the use of their newfound expertise in their academic and research endeavors.
