Ms. Rutvi Vaidya |
| Participating Students | M. Pharm (sem IV and sem II), All branches (51 students) |

SPARC is a pharma research and drug discovery company. It is a part of Sun Pharmaceutical Industries Ltd, when the parent company separated out its active projects in drug discovery and innovation into a new company. It has a team of scientists working since the year 2000 on different preclinical and clinical development projects.

Visit started at 11:00 AM with refreshments provided by SPARC. A brief introduction about industry was given by Mr. Dayaram Dhamala. The students visited different departments like F & D (solid and orals) and Analytical Department. An in length information and explanation about the analytical department and different analytical instruments was given by the Head of Department of the F&D. Lastly, an introduction about the industry was provided by a brief visual video presentation.

The interactions with Pharmaceutical delegates were much informative to explore the students in real practical world of Research and Development. We are thankful to Dr. Rashmin Pandya for allowing a visit to their plant.
